RETURNABLE / REUSABLE / RECYCLABLE

SR Industries has many years of experience providing high quality returnable textile dunnage to the automotive industry. We manufacture a wide variety of returnable packaging solutions based on our customers needs. Whether you are in need of the complete assembly or just the dunnage, we are here to help. SR Industries can supply the steel racks or plastic containers and handle the installation for you. There are several benefits when deciding to go with fabric packaging. Fabric returnable dunnage is excellent for Class A surface protection and increasing pack density. It is also cost effective and recyclable. We can easily design a returnable packaging solution to work with your new or existing containers and racks.

RETURNABLE TEXTILE DUNNAGE

WHY CHOOSE FABRIC

Fabric is reusable and offers better lifetime value and is more environmentally friendly. When you chose to have SR Industries sew your project, there is minimal tooling, if any, and a lower start up costs. This allows for a quicker launch and delivery of your product. Fabric also protects your parts better, reduces your waste, and improves your bottom line.

Benefits of Fabric:

- Class A surface protection
- Cost effective
- Collapsable
- Increased pack density
- Reusable
- No tooling cost
- Multiple fabrics to choose from
- Reduces waste
- Customizable to your current containers & racks
- Strength & durability

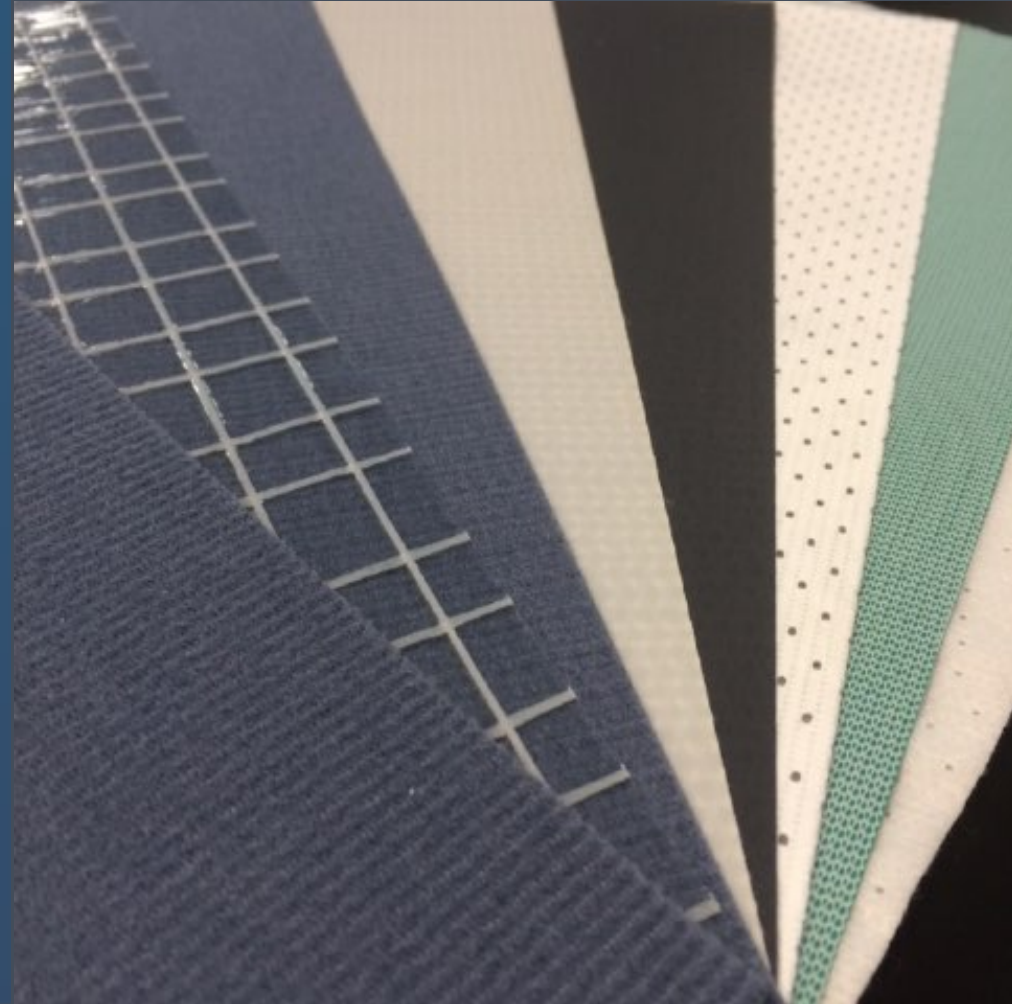

With a wide variety of fabric options and services, we can help provide input to help you achieve a material with the longest lifespan, durability and dependability, to meet the needs of your product. Our vast experience and broad knowledge working with such a variety of materials and fabric selections such as PVC, non-woven, and woven allows us to precisely turn your plans into finished products.

Common Materials Used:

- Milky Clear Vinyl - 13oz., 18oz.
- Double Polish Clear Vinyl - 13oz., 18oz., 30oz.
- Auto Gray PVC - 11oz., 13oz.
